Subject: TRNS Key Comments

Renee,

Below are the key draft EIS comments previously reviewed by Nossaman. Their comments have been incorporated by the project planners where practicable in light of agency coordination and requested changes to the EIS document.

These letters represent issues of concern and set a template for other letters. For example, Rob Thornton assisted with the refinement of the cumulative impact language, and the alternatives analysis language was also refined with Nossaman's assistance.

As discussed on today's telephone conference, the planners intend to date the letters as close as possible to the NOA date. In practice, HEPA responses to draft EIS comments are sent when the document is submitted for publication to the State Office of Environmental Quality Control.

The following letters are located in Appendix A of the CD attached to the Admin Final EIS (March 2010) recently sent to FTA. You should probably wait to start your review until you receive the next version of the EIS, which should be sent this week. The letters should be modified, if needed, to account for the Airport Alignment refinement.
